Gold King Mine-[Redacted] Recommendations on Strategic Approach and Response Tasks.pdf

Not you have this but my quick read of this is that portions of it speak to the long term sampling/watershed approach being developed – I suggest getting it to the appropriate individuals.

Mathy-

Thank you for giving me a few minutes to bring me up to date on some of your activities and initiatives in response to the Gold King Mine release. As I mentioned, we have a very strong mine remediation and mine water treatment practice, and we assembled an internal team of subject matter experts and developed the attached recommendations on a strategic approach and appropriate response actions. As written below, we intentionally started with a “blank sheet”, knowing that that you are already moving forward on several of these fronts. I hope you and your team find these recommendations helpful.

If you do go forward with forming a blue ribbon panel, we have high level experts with extensive mine water management experience with EPA and industry, and we would be honored to participate on such a panel.

Best of luck with Congressional hearings next week-undoubtedly those will be challenging.

Regards,

**Subject:** Recommendations on the Strategic Approach and Response Tasks for the Gold King Mine Release

Dear Director Woolford, Assistant Regional Administrator Hestmark, and Director Murray,

On behalf of my colleagues at **Citizen Name/Ex. 6** I want to express our admiration for the leadership that EPA and other federal, state, and local agencies are demonstrating in response to the Gold King Mine release. As communicated in a letter from **Citizen Name/Ex. 6** **Citizen Name/Ex. 6** to Regional Administrator McGrath, **Citizen Name/Ex. 6** I has a community interest in supporting the EPA in its response. As an initial effort, **Citizen Name/Ex. 6** is pleased to offer its preliminary thoughts on strategic approaches and recommendations for a series of tasks that we believe are critical to both the recovery and long term response effort. We purposefully developed these ideas and recommendations starting with a “blank sheet”, as we recognize that that you are already moving forward on several of these fronts. As **Citizen Name/Ex. 6** communicated to Regional Administrator McGrath, **Citizen Name/Ex. 6** subject matter experts are

available to support the development of your response strategy on a pro-bono basis.

We hope for the safety of your staff and the affected communities, and look forward to supporting you. Understanding how consuming this effort is, we will make ourselves available in whatever forum (conference call, at your home office, or at your incident command center) is most convenient to you. I can be reached anytime on my mobile phone Personal Phone/Ex. 6

Sincerely,

**Citizen Name/Ex. 6**
